Skills

- Frontend Technologies: HTML, CSS, JavaScript, React
- Backend Technologies: Node.js, Express.js
- Development Tools: Visual Studio Code, Postman
- Operating Systems: Windows, macOS

Yogesh Narola

FULLSTACK DEVELOPER

TO WHOM IT MAY CONCERN,

I am Yogesh Narola V., an aspiring Full Stack Developer in my third year of pursuing a Bachelor of Science in Information Technology (BSCIT). My powerful command of the English language enables me to effectively communicate and collaborate in remote work environments, a crucial skill for a Full Stack Developer. With a deep-seated passion for web and mobile application development, I am currently dedicating myself to upgrading my Full Stack skills, focusing on both front-end and back-end technologies. Throughout my academic journey, I have undertaken relevant coursework in areas such as web development and database management, equipping me with the foundational knowledge needed to excel in this field.

I am proficient in a range of technologies, including HTML, CSS, JavaScript, React, Node.js, Express.js, and Python (Django). I have experience with database management using SQL and MongoDB, version control with Git and GitHub, and integrating RESTful APIs. My development toolkit includes Visual Studio Code and Postman, and I am comfortable working across various operating systems.
